STEAM LOCOMOTIVE AND HISTORICAL BOILER HYDROSTATIC PRESSURE TEST CHECKLIST BSB 0600-05 Attachment 7 Rev 3

BOILER INFORMATION

| NC NO: | DATE: |
|-----------|------------------------|
| MAWP | Reference Attachment 3 |
| COMMENTS: | |
| | |
| | |
| | |
| | |
| | |

| INSPECTION INTERVAL: | INITIAL | INTERVAL 3 | |
|----------------------|---------|----------------------|--|
| INSPECTOR NAME: | INSF | INSPECTOR SIGNATURE: | |
| | | | |

For those items that are not applicable indicate "N/A" in REMARKS column.

| DESCRIPTION | ACC | REJ | REMARKS | |
|--|-----|-----|--------------------------|--|
| HYDROSTATIC TEST | | | | |
| BSB calibrated gauge # | | | | |
| Was installed on the boiler for comparison. | | | | |
| Boiler gauge identification used during the | | | | |
| hydrostatic test | | | | |
| Is the gage in calibration? | | | | |
| Yes No | | | | |
| Has the safety valve been removed? | | | | |
| Yes No | | | | |
| Temperatures during the test; | | | | |
| Water temperature = | | | | |
| Metal temperature = | | | | |
| The water and metal temperatures must | | | | |
| be between 60°F and 120°F during the | | | | |
| hydrostatic test. | | | | |
| Test pressure = | | | | |
| Duration of 10 minutes minimum. The test pressure shall be between the MAWP and 1.25 times the MAWP | | | | |
| Leakage observed during the hydrostatic pressure test. | | | List leaks in "Comments" | |
